

CLOSING DATE
07 May 2021

SENIOR PROCESS ENGINEER

SUMMARY

The Senior Process Engineer provides process engineering expertise to Operations and Projects. They will be initially focussed on supporting the current process safety programme of work, but capable of supporting operational plants both in manufacturing areas & continuous improvement in all plant areas to improve Safety, Quality & Delivery & cost.

SKILLS

You will have the ability to provide technical expertise to the Operations team for troubleshooting and continuous improvement of the site operations to bring solutions to process engineering problems.

You will provide professional Process Engineering expertise on major and minor capital investments. Where appropriate this will include being the designated Process Engineering representative at design reviews.

You will have experience of providing technical guidance and advice for design, installation & commissioning of projects. The role holder will support the integration of new projects into the existing SHE and Engineering systems to ensure smooth handover to the plant Operations team.

You will have the ability to mentor and coach more junior members of the team.

REQUIREMENTS

The successful candidate will be a degree qualified Chartered Engineer Degree, normally BEng or equivalent, in a relevant engineering discipline (Chemical / Process).

Victrex values diversity and encourages applications from all sections of the community. Please talk to us about flexible working.

▶ TO APPLY

In addition to a competitive salary we also provide a range of attractive benefits, including company pension and healthcare schemes. If you believe you have the drive and potential required to join our team, please email your CV to:
